Objective

Software Developer with 3+ years of experience developing SaaS, ERP, HRM, and other scalable business applications. Also skilled in AI-assisted development, MCP servers, AI agent maintenance, with experience in codebase QA, automated project auditing, code review, and vulnerability analysis. Focused on building intuitive, secure, scalable, and high-performance end-to-end software products while leveraging modern web technologies and AI-powered engineering practices.

AI & Development Expertise

- **MCP (Model Context Protocol)** - MCP server setup, integration, and tool-based AI workflows
- **AI Agent Development & Maintenance** - Building, maintaining, debugging, and improving AI agent workflows
- **Automated Project Auditing** - End-to-end codebase audits for functionality, code quality, performance, security, and potential regressions
- **Vulnerability & Risk Analysis** - Identifying security vulnerabilities, dependency issues, configuration risks, and potential failure points
- **AI-Driven Debugging & Troubleshooting** - Investigating complex front-end, backend, API, authentication, and integration issues

Work Experience

Software Developer | **BeyondAI** Mohakhali, Dhaka

November 2025 – Present

Architected and maintained a high-traffic SaaS dashboard serving 90K+ monthly active users using Next.js, TypeScript. And also Worked in a B2B-focused software development environment, contributing to AI-powered products, custom software solutions, and client-oriented development projects.

Front-End Engineer | **Ryven** Jatrabari, Dhaka

2024 - 2025

Worked in a B2C-focused software development environment, contributing to user-facing applications, AI-powered features, and customer-centric digital products designed to enhance user experience and engagement.

Web Developer | **Bdcalling** Rampura, Dhaka

2024 - 2024

Worked in an educational environment, delivering front-end development classes and mentoring students in core web technologies and modern front-end practices. Also developed web applications and digital solutions for B2C clients based on their requirements.

Technical Skills

- **Backend:** Nest.js, Express.js, MongoDB, Firebase, Python (Django)
- **Front-End:** JavaScript, React, Next.js, Angular, TypeScript
- **State & Real-Time:** Redux, Zustand, TanStack Query, Socket.IO, WebSocket, axios
- **UI/Tools:** Postman, Swagger, Insomnia, Chrome DevTools, ESLint, Prettier, SonarQube, GitHub Actions, Nginx, Vercel, Netlify, npm, pnpm, Yarn, Notion
- **Operating Systems & Environments:** Linux (Ubuntu), WSL2

Featured Projects

ValrPro – U.S. Veteran Benefit Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, Microservices, REST API, GSAP, VA.gov Lighthouse API, OneSignal, Stripe, Brevo, Sendbox, Vapi, Redux, Axios etc

Integrated VA.gov Lighthouse APIs for real-time veteran data synchronization and implemented AI-driven workflows to collect user information and populate UI forms. Developed claim submission workflows to VA.gov and implemented AI-powered analysis of DD214 and supporting evidence to generate reports and actionable insights.

Meeting Schedule – Reusable Meeting Scheduling NPM Package

Tech Stack: NPM, TypeScript, Express, django, MongoDB, Node, REST API etc

A reusable NPM package independently designed and developed to provide meeting scheduling functionality across partner websites. Built as a modular integration layer that connects partner websites with real-time meeting availability, allowing clients to select and confirm meeting dates while keeping the partner website as the primary interface.

Bright Side Car Wash – US-Based Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, Microservices, REST API, OneSignal, SquareUP for accept payments, Brevo, Vapi, Redux, Axios etc

Developed responsive React-based customer and admin interfaces with API integrations for services, memberships, bookings, payments, gift cards, and real-time notifications. Implemented AI-powered customer support, business workflows, and admin functionality for managing core car wash operations.

Empower Qubit – EdTech & Learning Management Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, Microservices, REST API, OneSignal, Redux, Axios etc

Developed a multi-role educational platform with separate dashboards, homework and assignment management, live classes, digital book sharing, and an interactive whiteboard for real-time drawing and annotation.

EmptyBD – Digital Marketplace & Social Platform

Tech Stack: Express, django, MongoDB, Node, Next.js, Microservices, Bkash for payment, TypeScript, GSAP, Tailwind CSS, Microservices, REST API, OneSignal, Brevo, Redux, Axios etc

Developed a social media and digital marketplace platform featuring real-time interactions and messaging with Socket.io and Zustand, Web Push notifications, and digital wallet functionality for deposits, withdrawals, and subscriptions.

Count Trust – Voting & Election Management Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, REST API, Redux, Axios etc

Developed a digital voting platform for a US-based partner, supporting voter participation, candidate management, election workflows, and secure result handling through a centralized web-based system.

Education

BSc in Computer Science and Engineering

Northern University Bangladesh, Dakshinkhan, Dhaka-1230

Diploma in Computer Science and Technology

Lakshmipur Polytechnic Institute, Lakshmipur

Additional Certifications

- Backend development with Python (django)
- PH Level-1 || Front End with Back End Fundamental
