

MD. Yasin Arafat Mubin

Full-Stack Software Developer

Contact Info

mubinulislam14@gmail.com | +8801560008450 | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

Objective

Passionate Full-Stack Developer with hands-on experience developing SaaS, ERP, HRM, and other scalable business applications using JavaScript, TypeScript, React.js, Next.js, Angular, Nest.js, and Python (Django). Skilled in AI-assisted development, MCP servers, and AI agent maintenance, with strong experience in codebase QA, automated project auditing, code review, and vulnerability analysis. Focused on building intuitive, secure, scalable, and high-performance end-to-end software products while leveraging modern web technologies and AI-powered engineering practices.

AI & Development Expertise

- **MCP (Model Context Protocol)** - MCP server setup, integration, and tool-based AI workflows
- **AI-Assisted Software Development** - Anthropic, AI coding agents, and AI-powered development workflows
- **AI Agent Development & Maintenance** - Building, maintaining, debugging, and improving AI agent workflows
- **Automated Project Auditing** - End-to-end codebase audits for functionality, code quality, performance, security, and potential regressions
- **Vulnerability & Risk Analysis** - Identifying security vulnerabilities, dependency issues, configuration risks, and potential failure points
- **AI-Powered Code Review & Refactoring** - Using AI tools to analyze, optimize, and maintain large-scale codebases
- **AI-Driven Debugging & Troubleshooting** - Investigating complex front-end, backend, API, authentication, and integration issues

Work Experience

Software Developer

BeyondAI (November 2025 – Present | Mohakhali, Dhaka)

Worked in a B2B-focused software development environment, contributing to AI-powered products, custom software solutions, and client-oriented development projects.

ValrPro – U.S. Veteran Benefit Platform

Integrated VA.gov Lighthouse APIs for real-time veteran data synchronization and implemented AI-driven workflows to collect user information and populate UI forms. Developed claim submission workflows to VA.gov and implemented AI-powered analysis of DD214 and supporting evidence to generate reports and actionable insights.

Bright Side Car Wash – US-Based Platform

Developed responsive React-based customer and admin interfaces with API integrations for services, memberships, bookings, payments, gift cards, and real-time notifications. Implemented AI-powered customer support, business workflows, and admin functionality for managing core car wash operations.

Front-End Engineer

Ryven (2024 - 2025 | Jatrabari, Dhaka)

Worked in a B2C-focused software development environment, contributing to user-facing applications, AI-powered features, and customer-centric digital products designed to enhance user experience and engagement.

Empower Qubit – EdTech & Learning Management Platform

Empower Qubit is a multi-role educational platform designed for schools, teachers, and students, featuring separate dashboards and workflows for different user roles. Implemented homework and assignment management, live classes, digital book/PDF sharing, teacher-specific class environments, and student learning dashboards. Developed an interactive digital whiteboard with drawing and annotation capabilities similar to collaborative design tools, enabling teachers to conduct more interactive online classes and learning activities.

Web Developer

Bdcalling (2024 - 2024 | Dhaka)

Worked in an educational environment, delivering front-end development classes and mentoring students in core web technologies and modern front-end practices. Also developed web applications and digital solutions for B2C clients based on their requirements.

EmptyBD – Digital Marketplace & Social Platform

EmptyBD is a social media and digital marketplace platform that combines community engagement, content sharing, real-time communication, and digital marketplace features. Developed real-time social interactions and messaging using Socket.io and Zustand, implemented Web Push notifications, and integrated digital wallet functionality with deposits, withdrawals, and subscription management to support a complete user-driven platform.

Skills

- **Backend:** Nest.js, Express.js, MongoDB, Firebase, Python (Django)
- **Front-End:** JavaScript, React, Next.js, Angular, TypeScript
- **State & Real-Time:** Redux, Zustand, TanStack Query, Socket.IO, WebSocket, axios
- **UI/Tools:** Postman, Swagger, Insomnia, Chrome DevTools, ESLint, Prettier, SonarQube, GitHub Actions, Nginx, Vercel, Netlify, npm, pnpm, Yarn, Notion
- **Operating Systems & Environments:** Linux (Ubuntu), WSL2
- **Other:** Database Management, Surveillance Security Systems

Education

BSc in Computer Science and Engineering

Northern University Bangladesh

Session 25 - Present, Dakshinkhan, Dhaka-1230

Diploma in Computer Engineering

Lakshmipur Polytechnic Institute

Session: 2021–2022 | CGPA: 3.14

Additional Certifications

- Backend development with Python (django)
- PH Level-1 || Front End with Back End Fundamental
- Achieved Rover Scout Certification at Lakshmipur District
